

Wycombe Wanderers are proud to announce that they have been awarded EFL Green Club silver status.

EFL Green Clubs is a League-wide voluntary scheme, delivered in partnership with GreenCode, that supports EFL Clubs to improve their environmental practices and operations.

It first launched in 2021 and was updated for the 2024/25 season to introduce a new assessment cycle that awards participating Clubs with a status of “Participant”, “Bronze”, “Silver” or “Gold”.

The refreshed scheme presents a more rigorous assessment process that requires participating Clubs to exceed standard sustainability measures, meaning all levels of the award represent a concentrated effort to implement environmentally sustainable practices at the Club.

Chairboys' Managing Director Tim Davies commented: “Everyone at Wycombe Wanderers is delighted to achieve the EFL Green Club Silver Award as recognition for the hard work across the club to improve our sustainability practices.

“We have made a great deal of progress in this area in a short time, and were pleased to be one of the first clubs in the EFL to commission a full carbon report to help us quantify this work and identify areas for improvement in the future.”

EFL Environmental Sustainability Co-ordinator Ben Fisher said: “Everyone at the EFL is delighted to celebrate Wycombe's commitment to environmental sustainability and it is brilliant to have GreenCode on board to help us support the Club at each stage of the assessment cycle. The Club has worked hard to reduce their carbon footprint and make a positive impact on their local environment, and thoroughly deserve to be recognised for their efforts.

“EFL Green Clubs is one of several ways in which the EFL supports Clubs to improve their sustainability practices. Throughout the season, we also deliver a full training and support package that enables us to share best practice across the League and to collectively tackle shared challenges in this area.”
