

Wycombe Wanderers are pleased to have been granted a Temporary Traffic Regulation Order (TTRO) which will enable the club to take over the management of Hillbottom Road on home matchdays.

The TTRO will give the club more control over the flow of pedestrians and vehicles both before and after games, with a new checkpoint for parking permits to be introduced further down Hillbottom Road, reducing congestion at the gate on arrival.

To prioritise the safety of pedestrians at full-time, the road will be closed to vehicles once the clock hits 90 minutes and reopened once the majority of the pedestrian crowd has dispersed.

The new TTRO also provides the opportunity for the matchday buses to drop off and collect passengers closer to the Adams Park gates.

Businesses situated along Hillbottom Road will still have access as usual to their properties and will still be able to operate matchday parking initiatives as before.

Coming into effect from the Reading fixture (23rd August) onwards, the club's traffic management will continue to be monitored on a game-by-game basis to ensure a safe and efficient flow of people and vehicles on home matchdays.
