

Wycombe Wanderers are recruiting for a Performance Psychologist based at Marlow Road on a part-time basis, with applications being welcomed until the closing date of 29th July.

Reporting to the Director of Performance & Medical, this role will contribute to the practical and strategic evolution of our player development and support process.

You will initiate performance support processes for first-team players, alongside engaging with Player Care staff and organising reflective spaces for players, coaches and other support staff.

You will lead the development of a Performance Psychology and Mental Health strategy for the first-team and academy, supporting an environment where everybody is recognised as part of the psychology strategy. In leading the club in this domain, you will engage additional expertise where necessary to build a network of support for players and staff including clinical referral, wellbeing, performance culture evolution, communication and interdisciplinary working, and player recruitment.
